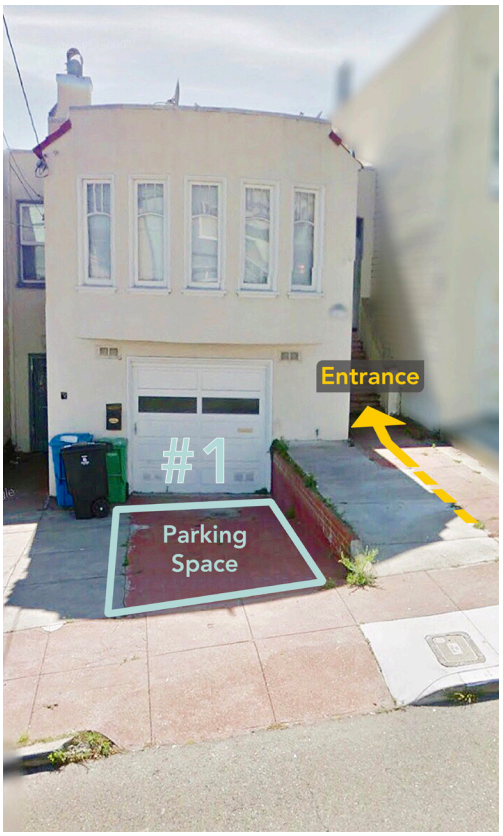
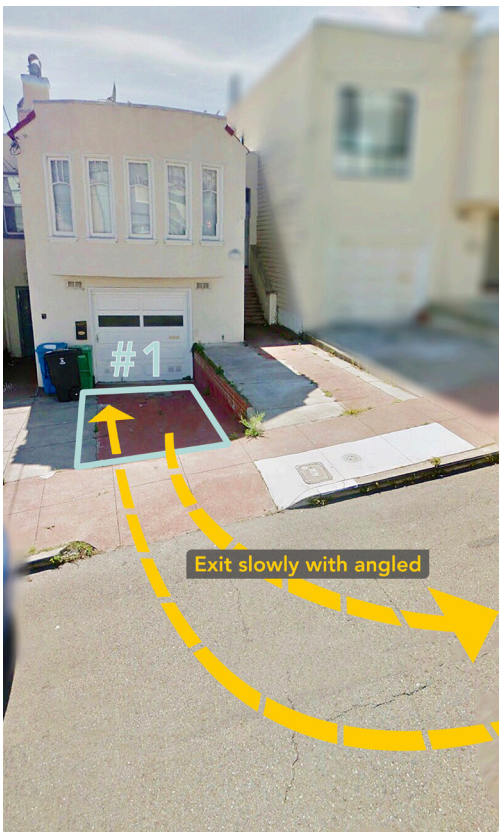
Parking Tips

Address:

147 Ralston St, San Francisco, CA 94132

Since street parking is not friendly in San Francisco, you can park in front of my studio! Here are some tips for parking and please let me know if there are any cars blocking the way.





For Parking Space #1, Please drive slowly in a downward angle when you park and exit the parking space. Since the floor is not flat, if you drive too fast or keep your wheel straight to exit, it may scrape the bottom of your car.

For Parking Space #2, You can block my garage door and please try to park forward and make sure to not block other house's driveway. And please be aware to not park on the street during the street sweeping dates and times.
