Beauty Prep Guide for hair

Four Weeks Prior

Hair:

Start to avoid using any new products for hair, including shampoos and conditioner. Because you won't know if it will cause any allergy or irritation for your hair.

One Week Prior

Hair:

Get your final color one week before your big day, not a few days before. This means that it will give your hair the time it needs to settle and also gives you enough time to make any changes if needed.

Your hair stylist should give your hair a final trim, taking away all the split ends without compromising the length.

The Night Before

Hair:

Please wash your hair without conditioner, and do not use any products in the hair, e.g. Serums, smoothing creams, argon/ Moroccan oil etc.

Blow dry your hair as smooth as possible ,and do not using a straightening iron.

Please don't drink alcohol, sleep early and rest well.

Preparation for Event day

Hair:

I suggest to wash your hair the night before but if you decide to wash in the event day, please make sure your hair is completely Dry and Clean before the service start.

And please wash your hair without conditioner, and do not use any products in the hair, e.g. Serums, smoothing creams, argon/ Moroccan oil etc.

Blow dry your hair as smooth as possible ,and do not using a straightening iron.

Others:

On the day wear a loose cotton button up shirt or cotton robe so your hairstyle is not affected when you change into your dress.

If you want the stylist to use your products, please have the products ready.

If you have any *cosmetics allergies*, please let the stylist know before it starts. And it is recommended to provide your own product instead.

If you are planning to use accessories during your days, such as a hairpiece, tiara, necklace, earring, or veil. Please have all the accessories ready before the service start.

Last, to make sure everything goes smoothly on your day, please come on time.

Thank you and I am excited to work with you.
